**Bihar Engineering University, Patna**
**VIII$^{th}$ Semester Examination - 2023**

*Course: B.Tech.* *Time: 03 Hours*
*Code: 100817* *Subject: Cloud Computing* *Full Marks: 70*

***Instructions:-***
*(i) The marks are indicated in the right-hand margin.*
*(ii) There are **NINE** questions in this paper.*
*(iii) Attempt **FIVE** questions in all.*
*(iv) Question No. **1** is compulsory.*

---

***Q.1 Write the answer of the following (Any seven question only):*** **[2 x 7 = 14]**

(a) Amazon EC2 is which type of clouding computing model?
(i) compliance as a service
(ii) infrastructure as a service
(iii) platform as a service
(iv) software as a service

(b) What does CAAS stand for?
(i) Computing as a service
(ii) Compliance as a service
(iii) Connection as a service
(iv) None of these

(c) What is private cloud?
(i) A standard cloud service offered via the Internet
(ii) A cloud architecture maintained within enterprise data centre.
(iii) A cloud service inaccessible to anyone but the culture elite.
(iv) None of the above

© Apna BEU

(d) Which of the following cloud concept is related to pooling and sharing of resources?
(i) Polymorphism
(ii) Abstraction
(iii) Virtualization
(iv) None of the mentioned

(e) The technology used to distribute service requests to resources is referred to as
(i) load performing
(ii) load scheduling
(iii) load balancing
(iv) All of the mentioned

(f) Different message passing topologies in SOA are respectively Circular, Network Star and
(i) Stove and pipe
(ii) Hub and Spoke
(iii) Mesh
(iv) Hierarchical

(g) Which one is not a second level attribute of Storage attribute?
(i) Query
(ii) Non-Relational
(iii) Data access
(iv) Replication

(h) What are the technology that played a vital role in cloud computing ?
(i) Mainframe
(ii) Utility Computing. Grid Computing. API
(iii) Web 2.0, Virtualization, Service Oriented Computing
(iv) Database Super computers.

(i) Which of the following techniques is vital for creating cloud computing environments?
(i) virtualization
(ii) personalization
(iii) localization
(iv) all of these

(j) Which of the following is not a cloud computing service/solution?
(i) Amazon EC2
(ii) Google GAE
(iii) IBM Deep Blue
(iv) Microsoft Azure

*Q.2* (a) Explain the concepts of laaS. PaaS. And SaaS. Use suitable examples and /or appropriate schematic diagram to help establish your understanding. [7]

(b) What is the difference between traditional data centres and cloud ? [7]

*Q.3* (a) Explain the issues with multi- tenancy. [7]

(b) What is a Service-Level Agreement (SLA)? How can SLA management be performed in cloud computing? [7]

*Q.4* (a) Explain the protocol stack for Service Oriented Architecture (SOA) with a neat diagram [7]

(b) What is an Amazon EC2 instance? Explain the process of launching an Amazon EC2 instance. [7]

*Q.5* (a) A small sized enterprise is contemplating an email solution for their employees. What are the reasons you would suggest a cloud computing solution or a traditional solution? [7]

© Apna BEU

(b) Define Cloud computing. Explain different service models of cloud with example. [7]

*Q.6* (a) What is VM migration? Explain the concept of any VM migration technique. [7]

(b) Describe the IBM smart cloud architecture and core services. [7]

*Q.7* (a) What is a hypervisor? Explain the types of hypervisor. Explain what is meant by Identity as a service. [7]

(b) Explain cloud computing security architectures. [7]

*Q.8* (a) List and discuss different types of security challenges in cloud computing. [7]

(b) What is IoT? How IoT edge device collaborate with cloud technology to process & collect data. [7]

*Q.9* Write short notes on any two of the following: **[7 x 2=14]**

(a) Green cloud
(b) VM ware.
(c) Amazon AWS
(d) Virtual Machine Monitor (VMM)
